

Navigate the COGCC Regulations without a second guess...this is a *must attend* webinar

Did my field techs collect everything I need to fill out my new forms???

I forget...do I need to log more than 200 feet from the proposed well site???

I ensure your field techs know what they need to collect...all within your budget.

WEBINAR SCHEDULE

These webinars are focused on the changes in the COGCC for Oil & Gas regulations and is hosted by Petroleum Field Services, CartoPac Field Solutions and Spatial Solutions Group.

Learning Objectives:

- * Who it affects, and what is now required in supporting the new COGCC requirements.
- * Form 2A required exhibits and technologies to capture data in the field.
- * Tools and benefits of the Comprehensive Drilling Plan.
- * What *Solutions* are available and how to go about implementing them.
- * Attendees should have an understanding of how Colorado Oil & Gas companies can address the need to comply to new COGCC regulations.
- * Attendees should have a better understanding of how mobile technology can be used to help meet the demands of both field and office personnel for various departments that work with field data collection.

For more information and registration, please call Sarah Howarth at 303.928.7128 or e-mail at sarah@petro-fs.com.
