

Are you prepared for the upcoming COGCC workflow changes?  
Navigate without missing a step...this is a *must attend* webinar

Did my field techs collect everything I need to fill out my new forms???

Do I need to log more than 200 feet from the proposed well site???

Ensure your field techs know what they need to collect...all within budget.

## WEBINAR REGISTRATION OPENS FRIDAY, MARCH 6th

### *Snapshot of the COGCC Regulations, March 25, 2009 9am-10am (MST)*

This webinar is highly focused on a few of the changes in the Colorado Oil & Gas Conservation Commission (COGCC) Oil & Gas regulations.

#### Focused Topics Include:

- The 200, 300 & 1200 Series of the regulatory changes, who it affects, and what is now required in supporting these new requirements.
- Form 2A required exhibits and technologies to capture data in the field.
- Tools and benefits of the Comprehensive Drilling Plan.
- What technologies are available and how to go about implementing them.

Wednesday, March 25th  
9:00am - 10:00am (MST)  
Cost: FREE (space is limited)

#### Who Should Attend:

Senior & Executive Management; Project Managers; Operation Managers; Engineering; Regulatory & Legal Managers; GIS Analysts, GIS Technicians, and GIS Managers; Project Coordinators; Spatial Data Managers; Programmers; Oil & Gas Operators; and Field Technicians
